

# Get the network-driven insights you need to scale

Partner with healthcare's most adaptable, network-enabled service. Start driving better outcomes for your patient populations and increased revenue for your member physicians while growing your membership.

We partner with provider organizations to build high-performing physician networks to effectively coordinate care – regardless of how you get paid.

## Build a high-performing physician network

Regardless of how you get paid, your success is increasingly dependent on the quality and productivity of your network. Our network-enabled services give you unique visibility and insight into provider behavior and performance so that you can seamlessly coordinate care and drive results.

We maintain quality program requirements within the provider workflow to inform care decisions and help you keep up with changing quality measures without extra work.

We provide services such as direct scheduling, network visibility, and essential patient data at the point of care, keeping you connected and aligned with your physician network.

We help you succeed in managing risk by collecting and seamlessly integrating clinical, financial, and demographic data from the nation's largest clinical network into our care management workflow, filling care gaps and simplifying coordination. The results are improved quality measures, lower total cost of care, and happier patients.

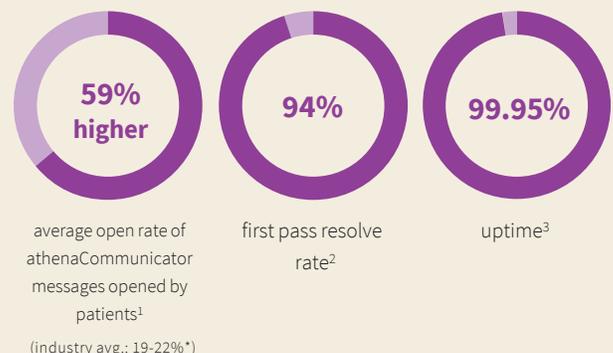

## Keep providers happy and patients engaged

We organize the moment of care so that physicians can focus on the patient instead of paperwork. You get the information you need to control point-of-care decisions, and delight patients with the quality of their experience. We've seen these benefits drive physician and patient loyalty across both employed and affiliate provider organizations. By providing you with unparalleled visibility into your local network we enable you to drive growth and an even more impressive ROI.

## Get paid more, faster, and with less work

Our financial success is aligned with yours – we only get paid when you do. We're committed to helping you achieve measurable ROI with no up-front investment. And we take on time-consuming administrative work so you can lower your total cost to operate and focus on patient care and practice growth. All of this along with our unmatched ability to scale at a rapid pace drives results for you and your member physicians.

## Why athenahealth

athenahealth delivers the industry's most adaptable, network-enabled service, designed to scale easily with business needs and keep practices on top of industry changes and focused on patient care with a combination of:

**Proven expertise** that delivers an unparalleled customer experience, and can help improve clinical and financial outcomes.

**Modern, nimble technology** that keeps up with the pace of change.

**An open, connected network** of more than 140,000 providers that ensures our customers always have access to the best solutions and the right information.

**Collective insights from the network** that grow richer and more actionable with every provider who joins the platform. We surface the right information at the right time so you maximize both fee-for-service and value-based payments.

## athenaCollector®

Our network-enabled revenue cycle management service that enables clients to maximize revenue, reduce administrative burden, and stay ahead of industry changes.

## athenaCommunicator®

Our network-enabled patient engagement service that delights patients with an improved experience, and gets them more fully engaged in their own care – all while eliminating unnecessary practice work.

## athenaClinicals®

Our network-enabled EHR service that organizes the moment of care to help providers maximize their clinical productivity. We also execute administrative and quality program services for providers, including tracking all orders to close the loop on care.

## Population Health®

Delivers network-enabled technologies and services that support achievement of value-based performance and reimbursement goals. Population Health sets itself apart from other solutions with its multi-source network data aggregation services, actionable point-of-care insights, and intuitive care coordination tools.
